Unlike other kinesiology techniques that teach you to eliminate allergen's from the patient's diet, and lifestyle, Natural Healing teaches you to adapt your patients and family to the environment they're in. Eliminating allergen's from people's diet's and lifestyle is not only disruptive but actually a downward spiral. They can become increasingly more allergic.

We live in a harsh environment, bombarded with toxic pollutants and chemicals in our food, water and air. People are over medicated and unnecessarily vaccinated, leading to a rapidly rising increase in allergies and multiple chemical sensitivities.

If a person becomes allergic to the new carpets they have put in, what do you advise?
 Remove the carpets??***!! Wouldn't it be easier to harmonize them to their carpet .
 Natural Healing will teach you how to do this, along with many other unique corrections.
Doctor's all over the world are stating how they learn more in 3 days with Natural Healing then they ever have in college, or other long standing seminars.

Ever noticed how health food junkies who eat only organic and keep their environment as chemically free as possible, wind up sick when they eat in a regular restaurant? See how they blame the food and environment? It's their bodies that are sick, they need to adapt to their environment, as changing our environment to match out bodies is a futile task.

Have you ever thought of the body being a computer?

Have you ever thought of the brain and the body working as a whole computer unit?

Have you ever wondered if they work together as a team?

The body needs information. If given wrong information it becomes confused.

The communication then goes off line, and then the body needs a form of re-boot to get things back on line.

Natural Healing is a unique and extraordinary therapy that produces extremely fast results, with most patients feeling a significant improvement in their symptoms within the 1st - 2nd office visits. It is aimed at optimizing your patients' health in less of your valuable time. Every person deserves to be healthy! Natural Healing will help accomplish this goal without the use of medication or pain.

Imbalances in the body are detected through muscle testing whilst touching specific body points (similar to acupuncture points) and corrected by tapping with the fingers along the nerve rich area of the spine. Much like Acupuncture it is believed that energy channels (meridians) are linked to internal organs and illness occurs when meridians are blocked.

The nerves connected to the spine, organs and muscles, act much like an electrical circuit connected to the brain, and hence the body acts much like a computer. The brain is the primary control of both branches of the nervous system. Sensory fibers carry messages to the brain where they are processed, like a computer, and the brain in turn, tells the body what to do.

Research has proven that under sufficient stress, the neurons in the brain centers (which control the stressed organ or body part) depolarize. This is comparable to blowing a fuse on an electrical circuit the message gets to the brain but fails to return. This leaves the organ or body part running out of control, and hence results in symptoms.

Through muscle testing and stimulating specific body points the neurons can be re-polarized and the brain will regain control of the body and guide it back to health. In energy terms, when the meridian channels become blocked, symptoms appear. Stimulating specific body points results in the meridians becoming unblocked, resulting in a return to health.

This is the age of computers: Everyone depends on a computer some way or another nowadays. Our own body is a vast computer. It has systems and programs that need to be up and running all the time.

Natural Healing techniques are quick and easy to receive. Every person deserves to be healthy! Natural Healing will help accomplish this goal without the use of medication or pain.

The physical, mental, emotional, and spiritual systems are seen as the sum total of a person's health. The aim of Natural Healing is to detect and correct the true cause of symptoms, not repeatedly chase re-occurring symptoms. Natural Healing is a 90% Technique, which means 90% of the time it will correct the cause and 10% of the time you may have to use other techniques.

Dr. Randall J. Frank, ND, (My Teacher and The Inventor of Natural Healing)

My teacher and founder of this healing system Dr. Randall J. Frank, ND, has been involved in alternative health all of his life. He is the son of Dr. Victor L. Frank, DC, NMD, D.O. founder of Total Body Modification. (T.B.M.) Dr. Victor L. Frank is the developer and Instructor for T.B.M. From this one brilliant man, came Functional Physiology. New techniques have been developed in health care around this philosophy.

All the techniques are dealing with Functional Physiology of the body, and how to correct the problems without medication, and making use of the body's own abilities to heal itself.

Quotes others are saying

The changes are phenomenal and vast. I treat patients of all ages for many different problems some of which took months in the past and I have changed them in days or even hours with Natural Healing.

I'm so excited my patients are so excited. This week I treated 3 patients with eye problems. one woman couldn't see color or words on the wall we stabilized the rods, cones, optic chiasm, cleared the eye muscles and all of a sudden she says oh that's red and that's blue and that says SUBLUXATION. I have had people's eye sight change in the past, but they were few and far between and it was gradual over time. We took a drug addict several years ago and made lots of changes to help her but we only got so far and she would still take drugs on the weekend.

Two days we ran Learning, BOS body optimizing program and Psychologist in a pouch. It changed her countenance and I received a call from her sister who received a phone call on Saturday (she never gets a calls nor has she been able to call her drug addict sister on the weekends because she always gets on the drugs and you don't hear from her again till Monday when she wishes she had not done it) She actually feels like getting well. I have so many stories and I have only been using Natural Healing the last two weeks.

Patients and conditions are coming out of the woodworks. Tremendous

Dr. Gilbert Danforth

Dear Dr. Frank,

I just wanted to thank you for what you have done for my brother. We came to see you because I wanted to see if you could help him. He has been labeled as having ADHD and minor retardation. He sees a brain therapist named Dr. Sterman every week. After you worked on him, the next time that he saw Dr. Sterman, there had been profound changes that had been observed with my brother's progress.

The doctor told my mother about the major leap in improvement in brain waves. MY mother told the doctor that Dr. Frank, through Natural Healing had worked on my brother and that is probably what the major change was due to. So I wanted to write to you and thank you for what you have done for my brother!

Sincerely, Linda Bedassian

Learn how to communicate with the body, and let the body decides it needs. I have been using the Natural Healing technique's for the past three weeks and it is amazing what it has done to my practice. I was seeing 30 to 40 patients daily before I took your seminar and within three weeks I have just about doubled my patients to now 50 to 60 per day. My patients are responding better than they ever have before and I feel as if I'm working half as hard. Thank you for your continued education towards the well being of the human race. It has been a tremendous complement to my practice, the many patients who are touched by it's magnificent power, and to my own well being as a doctor.

Affectionately, Dr. Darren Weissman D.C.

Thank you so much for the incredible information you gave us at the seminar, the ability you have is beyond comprehension at times, I feel very fortunate to be able to see the miracles your work can perform you truly have a direct pipeline with the universal knowledge. Please E-mail me any and all new information you feel compelled to, I will apply it immediately and keep you abreast of all results, not that they would surprise you in any way.

Thank You Again, and Best Days, Dr. Keith Jordan, DC

Dear Randy,

I didn't have the opportunity to talk with you and tell you how much I enjoyed your seminar. Probably the one thing that motivated me to finally take it (aside from my already being there) is getting new students into TBM who have already taken NH.

Except for the things you've shared with TBM, I didn't know what it was about. And, I think you know, I was waiting for you to grow up some. I don't know whether you've changed or whether I just couldn't see you for the pipe and the attitude, but you did a great job. This is the first time I have experienced you coming from love and teaching in the conviction that what you are doing is naturally right. Even having your father in the class you didn't try to show off, you just did your job. And--I have no right to be--but I was proud of you.

Dr. Jacqueline L. Paltis DC

The skill that become available thru the Natural Healing workshops are effective, rapid, predictable and time saving. These approaches support rapid intervention and resolution of physical emotional and mental problems. Natural Healing has transformed and revolutionized my understanding of problems and my care of patients

Thank You Bruce Fabric, MD

Dear Dr. Frank,

Your work has changed my life. I came to see you when I thought all hope of ever living a normal life had vanished. I am 25, and suffered from Fibromyalgia, Multiple Chemical Sensitivity- I ate only fruits and some vegetables, as my intestinal problems were so severe- I could not have a bowel movement on my own for several years- I was in constant pain, trapped in my home from allergies to everything in the environment, praying for a miracle to happen before I gave up on living through another day of intense suffering. Through fate, and the help of so many kind people, I made it to Las Vegas and spent five days with you for intensive treatments.

You brought my health back up to a level that I had never imagined possible- I feel like a completely new person. Every facet of my being has changed- I am experiencing true healing and joy for the first time in my life. Your work focuses not only on the body and symptoms, but on the mind, the emotions and the spirit- all of which play an equally important part in a person's health. Your skill, intuition, compassion, determination and understanding of the human body are what make you such a remarkable and skilled healer. Your work is especially invaluable for those with Environmental Illness, because you are the only one who offers a REAL solution- one that involves living in the REAL world!!! I am continually amazed at your dedication to your patients, and your ability to get to the core of the issue at hand. I always look forward to speaking with you as you are truly a genuine person.

I wish you all the best,

Teresa Calouche.
